In what way are McDonald's responsible for

torture and murder?

THE menu at McDonald's is based on meat. They sell millions of burgers every day in 35 countries throughout the world. This means the constant slaughter, day by day, of animals born and bred solely to be turned into McDonald's products.

Some of them - especially chickens and pigs - spend their lives in the entirely artificial conditions of huge factory farms, with no access to air or sunshine and no freedom of movement. Their deaths are bloody and barbaric.

LIBERATION BEGINS IN YOUR STOMACH

THERE are loads of cheap, tasty and nutritious alternatives to a diet based on the decomposing flesh of dead animals: fresh fruit of all kinds, a huge variety of local & exotic vegetables, cereals, pulses, beans, rice, nuts, wholegrain foods, soya driks etc. All over the country wholefood co-operatives are springing up. Now is a really good time for change.
